# Creating more from wood ...

Michael Egger,  
Fritz Egger

**» ...HAS BEEN OUR MISSION SINCE OUR FATHER FRITZ EGGER SENIOR LAID THE CORNERSTONE FOR THE EGGER GROUP IN 1961 WITH THE FIRST CHIPBOARD PLANT IN ST. JOHANN, TIROL. IN THE MEANTIME, EGGER HAS GROWN TO 17 PLANTS IN SEVEN COUNTRIES WITH 7,200 EMPLOYEES. «**

As owners we have the incentive, motivation and obligation to continuously develop the EGGER Group and thereby **make progress** for our customers, partners and employees.

We want to remain independent as a **family company**. That is why we count on **sustainable international growth** based on our own performance.

Our **employees** are key to our success. Their knowledge and experience make the decisive difference in keeping us competitive.

EGGER stands for **quality** in all aspects, for **personal cooperation based on partnership** and progress. We will ensure that things will stay this way for a long time.

Michael Egger

Fritz Egger

**GROUP MANAGEMENT**

Walter Schiegl, Ulrich Bühler, Thomas Leissing

**» TO BE EUROPE'S LEADING BRAND FOR WOOD BASED SOLUTIONS – THIS VISION IS THE GUIDING PRINCIPLE OF OUR ACTIONS. «**

Our values as an independent family company form the foundation for the ongoing further development of our brand. **Quality, respect and progress** form the basis for working successfully with our employees and partners. From the **natural resource wood**, we create high-quality products and solutions found in many aspects of everyday life: for example, worktops or doors in the kitchen, tables or cabinets at

home or at the office, laminate flooring for homes and businesses and structural elements in wood construction. Our products are as diverse as our customers. We provide our **complete range of products and services** for the wood processing trade through a comprehensive network of distributors. We create **solutions** for challenging projects through shared dialogue with planners and architects.

In the furniture industry, our products and decor developments set the standard for furniture trends. We also supply international DIY groups with products that offer additional benefits for the end consumer.

We are well prepared for the **future**. We have updated our existing plants with the **most modern available technology** and have also invested in new plants with a comprehensive investment programme. In doing so, we have created the industrial basis on which we will continue expanding our **innovative product spectrum** at the highest level.

We are working with all **EGGER** employees every day, striving to ensure that **EGGER** remains unique and **unmistakeable**.

Thomas Leissing

Ulrich Bühler

Walter Schiegl

St. Johann in Tirol is located at the foot of the "Wilden Kaiser" – where the roots of our family company were founded.

To be Europe's  
leading brand  
for wood based  
solutions.

*THOMAS LEISSING, ULRICH BÜHLER AND  
WALTER SCHIEGL ON THE VISION OF THE EGGER GROUP*

» EGGER acquired its reputation as an innovative, dynamic company over the course of decades. This begins with our basic materials and extends to the development of innovative materials and to trend-conforming decors and surfaces. We develop more than just products, we create solutions for our customers. «

**ULRICH BÜHLER**  
MANAGEMENT SALES/MARKETING EGGER GROUP

» The integration of our partners is very important for us. We build on long-term relationships, both on the supplier side and with our customers. We consistently integrate our partners closely in our processes since this is the only way we arrive at the best solutions for all participants. «

Back to our roots: We have been operating our own sawmill in Brilon since 2008.

» Openness and transparency towards our employees, the general public and our neighbours are the foundation for identification with EGGER. The sustainability and environmental compatibility of our raw materials, products and processes are especially important to us. «

**WALTER SCHIEGL**  
MANAGEMENT PRODUCTION/TECHNICAL EGGER GROUP

» Our employees are important ambassadors for us – both internally and externally. They are a key success factor for EGGER. That is why we support them with targeted training and continuing education programmes and offer them attractive career opportunities. We engage in long-term thinking and count on many years of employment and experience. We view ourselves as a team that jointly pursues objectives and creates opportunities for the future. «

**THOMAS LEISSING**  
MANAGEMENT FINANCE/ADMINISTRATION/LOGISTICS EGGER GROUP,  
GROUP MANAGEMENT SPOKESMAN

Radauti is located in North-Eastern Romania and has a modern and environmentally friendly technology.

The star cooler is located at the end of the production process for all our base materials – chipboard, MDF board and OSB board. From there the boards are moved to the conditioning stores before being processed in many different ways.

## **INTERNATIONAL PRESENCE**

WE PRODUCE AND MARKET OUR PRODUCTS IN EUROPE, INCLUDING RUSSIA AND TURKEY. OUTSIDE EUROPE, WE ESTABLISH SALES OFFICES IN MARKETS OF STRATEGIC IMPORTANCE. IN EXPORT MARKETS WITHOUT A SALES OFFICE, WE COOPERATE WITH STRATEGIC CUSTOMERS.

## **INNOVATION**

NEW DEVELOPMENTS AND ESPECIALLY THE FURTHER DEVELOPMENT OF OUR PRODUCTS, PROCESSES AND SERVICES ARE MAINLY GUIDED BY CUSTOMER BENEFITS AS THE BASIS FOR OUR LONG TERM SUCCESS.

## **INTEGRATION**

AS REGARDS OUR STRATEGIC PRODUCT GROUPS, WE CONTINUE TO STRIVE TOWARDS IMPLEMENTING INTEGRATED PLANTS FOR RAW MATERIALS AND ENERGY. THIS HELPS US TO OPTIMISE OUR INVESTMENTS AND REALISE SYNERGIES IN THE USE OF RAW MATERIALS AND LOGISTICS WITHIN THE ORGANISATION. LONG-TERM PARTNERSHIPS WITH CUSTOMERS AND SUPPLIERS ALSO PROVIDE SYNERGIES, MUTUAL SECURITY AND SUCCESS.

## **IDENTIFICATION**

WE ARE THE BEST EMPLOYER IN THE RESPECTIVE EMPLOYMENT MARKET RELEVANT TO US.

*THE OWNERS AND GROUP MANAGEMENT HAVE ESTABLISHED WHAT THE EGGER GROUP STANDS FOR IN OUR MISSION STATEMENT.*

At the right time in the right place – our logistics keep EGGER on the move. We count on electronic warehouse management and use various means of transportation – by rail, by ship and by truck – in order to ensure our products reach our customers quickly and reliably.

## INTERNATIONAL PRESENCE – EGGER ON SITE

EGGER THINKS INTERNATIONALLY AND ACTS LOCALLY.  
 PROXIMITY TO OUR CUSTOMERS AND OUR RAW  
 MATERIALS IS CRUCIAL.

We are represented in seven European countries with 17 plants. Continuously developing and modernising our plants as well as expanding in existing markets and developing new ones is what drives us. We consider ourselves an internationally operating family enterprise with Tirolese roots focusing its activities in Europe. However, supplying export markets from Asia to Oceania to America is also part of our strategy.

Our logistics take advantage of all available means of transportation – trucks, rail and ships – to secure our

raw material supply and always get our products where they are needed quickly.

At EGGER, an international presence simultaneously means regionalism. Our key raw material wood never has to travel more than 250 kilometres to be processed in one of our plants. Short routes ensure speed and sustainability.

**KLAUS MONHOFF**  
HEAD OF DESIGN AND DECOR MANAGEMENT  
EGGER GROUP

EGGER offers a diverse range of online services: from the free VDS MOBILE App through to the personalised myEGGER information source.

## INNOVATION – OUR SOLUTIONS RESULT IN PROGRESS

KLAUS MONHOFF, HEAD OF DESIGN AND DECOR MANAGEMENT AT EGGER, WORKS WITH HIS TEAM ON THE DECOR AND SURFACE TRENDS OF TOMORROW. THEY ALSO ALLOW EXCURSIONS INTO OTHER INDUSTRIES TO INSPIRE THEM. FOR EXAMPLE, THEY DERIVE TRENDS FROM THE AUTOMOBILE, TEXTILE AND FASHION INDUSTRIES AND TRANSFER THEM TO THE WORLD OF FURNITURE AND INTERIOR DESIGN.

ZOOM is our successful collection for wood-based materials and decorative materials for furniture making and interior design.

Time and time again, we successfully set trends in the furniture industry. The pivot and focal point is always the EGGERZUM in-house exhibition held annually in our plants, where we present current design and decor trends to our customers. It forms the basis for design ideas of new furniture programmes. At the same time, we receive important feedback which in turn forms the basis for future decor developments.

The importance of textures and materials has increased. Our EGGERZUM motto "Matchworx" aims at combining and matching colours, styles and textures in an entirely new way: A broad selection of perfectly matching and particularly deep textures that not only make our decors appear more genuine and natural, but also give them a very special character.

Our ZOOM collection for distributors, fabricators and architects establishes design accents as well. For better orientation, all of the designs are organised in so-called "decor worlds". For example, "Texture meets Colour" is one of the twelve decor worlds. Thanks to perfectly coordinated surfaces, the various uni colours exhibit an individual character. Matt-gloss effects or deep textures offer new possibilities in furniture and interior design.

Roma Plastik, a member of the EGGER Group, manufactures "edging solutions" that have been specifically matched to EGGER's decorative products.

In 2014, our successful ZOOM collection was expanded with 20 decors and 6 new textures under the motto "Experience the difference." Our three Feelwood synchronised pore textures (the image shows Feelwood Nature ST28) display a new quality that comes from the depth of textures and their authentic effect. Another highlight offered by EGGER starting now are the compact laminates with black and white cores (the image shows the Cashmere U702 ST9 decor).

## INNOVATION DRIVER FOR ARCHITECTURE, INDUSTRY AND TRADE

INNOVATION IS VERY IMPORTANT AT EGGER. WE CONSTANTLY EXPLORE HOW WE CAN FURTHER DEVELOP OUR WOOD-BASED MATERIALS, BE IT IN QUALITY, IN THEIR APPLICATION CHARACTERISTICS OR BY FOLLOWING COMPLETELY NEW PATHS. WE WORK ON THIS EVERY DAY. THIS IS BECAUSE WE INTEND TO OFFER OUR CUSTOMERS THE BEST POSSIBLE SOLUTIONS.

- 1 Surface layer 8 mm
- 2 Cardboard honeycomb core
- 3 Surface layer 8 mm

### THE SIX ADVANTAGES OF EUROLIGHT

- Saves resources
- Stability and value
- Design freedom
- Versatile applications
- Easy to install and transport
- Weight and mobility

### cork<sup>+</sup> TECHNOLOGY MAKES THE DIFFERENCE

The direct print method (DPR) is used to apply the actual pattern image to the upper, highly condensed cork layer. It is then permanently sealed with environmentally compatible elastic varnish. This makes flooring with **cork<sup>+</sup>** technology more robust than many cork ready-to-use parquet floors.

Product advantages of flooring with **cork<sup>+</sup>** technology:  
Warm – soft – silent – robust – ecologic

- 1 Durable UV surface layer structure
- 2 Printed decor
- 3 Primer for a brilliantcolour appearance
- 4 High-density, resilient top-layer with **cork<sup>+</sup>** technology
- 5 Swell barrier-plus coreboard made from natural wood fibres
- 6 Integrated underlay, made from natural cork

We are continuously investing in our production processes. Our objective is to always be state of the art. In addition to optimising our production processes, this also protects the environment. We work closely with the mechanical engineering industry in order to achieve this. Electronic processes allow us to significantly simplify and accelerate

our processes: from wood procurement using online portals to electronic processing of decorative paper purchases with RFID (radio frequency identification) technology to RELAG electronic warehouse management deployed at all EGGER plants.

**INNOVATIONS ARE NOT ALWAYS AS STRIKING AS THEY ARE IN OUR LATEST PRODUCTS. WE ARE ALSO CONTINUOUSLY WORKING ON IMPROVEMENTS TO OUR PROCESSES THAT ENHANCE OUR PERFORMANCE.**

< Nature was our model for **EUROLIGHT**: The functionality of the board with an surface layer of thin chipboard and a cardboard honeycomb core is based on a bee hive. It is lightweight yet also incredibly sturdy. The perforated **ProAcoustic board** reduces sound in rooms from concert halls to offices.

We manage our decorative papers with modern **RFID** technology (radio frequency identification). It allows the flow of goods to be automatically controlled using wireless technology. >

The direct print flooring line in Brilon produces up to 30 million m<sup>2</sup> (323 million square feet) per year.

The roundwood yard of our sawmill is five hectares in size and holds up to 80,000 solid cubic metres of wood. Logs are transported at a speed of up to 170 m/min which corresponds to an average saw output of 1,300 solid cubic metres per shift. A so-called “harvester” at work: In Great Britain, backwards integration extends to EGGER’s own wood harvesting operations.

## INTEGRATION — REACHING OUR GOALS FASTER THROUGH PARTNERSHIPS

We stand for fair and trustworthy partnerships with our suppliers and customers.

### THE FORWARD AND BACKWARD INTEGRATION OF ITS PARTNERS ALONG THE VALUE CHAIN IS ONE OF THE COMPANY PRINCIPLES OF EGGER.

We count on integrated plants for the production of wood-based materials, optimum utilisation of raw materials and an independent energy supply. The example of our Brilon plant illustrates how the “resource” wood is fully utilised. From timber production in our own sawmill to board production from sawmill by-products to the use of wood waste that cannot be utilised materially in our own biomass power plant.

We focus on our core business and, in order to procure our raw materials,

involve ourselves in all segments essential for a long-term supply guarantee and quality optimisation. For example, we operate our own glue factories for the production of resins and binding agents at our locations Wismar (DE), Hexham (UK) and, since 2011, also in Radauti (RO).

With our own forestry companies, EGGER Forestry in England, HolzLogistikHandel (HLH) in Austria and EGGER Forst GmbH in Germany, we secure the supply of raw materials for our wood processing plants. EGGER Forestry is engaged in wood harvesting in the heavily forested regions of Northern England. EGGER Forst GmbH views itself as a service provider and partner between woodlot owners and the wood processing industry. We also arrange the procurement of residual wood and the corresponding recycling process within the company.

We produce resin for use in our own production facilities Radauti and Wismar. This assures product quality and keeps us independent.

For the integration of its suppliers into the value creation process, EGGER takes advantage of electronic data interchange workflows and therefore accelerated and secure processing: from wood and paper purchasing to warehouse management and invoice processing.

## DIGITAL SOLUTIONS CREATE ADDITIONAL BENEFITS FOR OUR CUSTOMERS

The EGGER Virtual Design Studio (VDS) was awarded with the “German Design Award 2012” in Silver, the “iF communication design award” 2010 and the “red dot award: communication design 2010”.

The daily personal dedication and commitment of our employees forms the basis for cooperation with our customers. We support them in all processes from planning to delivery, with a variety of digital solutions.

We involve our customers starting with the digital development process. New decors and textures are jointly developed and we use digitalised decor data in the sampling process in order to speed it up significantly. To provide additional confidence the selected decors can be visualised in

photo-realistic room settings using our Virtual Design Studio (VDS).

A screen on which users can exchange and combine the surfaces of a furniture design whatever way they please – that’s the idea behind the award-winning family software VDS. In the HD LIVE version of the Virtual Design Studio (VDS), the decors are projected onto a neutral carcass using a projector. Now, EGGER has expanded the system with the Kitchen Box in order to provide more support to our valuable partners in the kitchen

industry. The new system complements conventional kitchen studios.

Digital decor data also forms the basis for the realisation of specific requests or small production runs using digital printing. The benefits of digital printing includes shorter decor development cycles and risk reduction through smaller production runs and therefore we can open up entirely new possibilities and product developments to our customers.

We also realised our digital solutions in the EGGER Truck, our showroom on four wheels. The entire EGGER product world is presented in the smallest possible space. The environmental cycle shows animated and live-action video sequences, from sustainable forestry through the production of wood-based materials to the use of waste wood in biomass power plants.

The material library, part of the virtual EGGER house, which is installed in the Truck, allows customers to navigate through various rooms by controlling an interactive glass table and to get all information on the installed EGGER products.

We won the “iF communication design award 2012” and the “red dot Design Award 2011” for our EGGER Truck material library.

## IDENTIFICATION – ONE COMPANY, MANY FACES

7,200 EGGER EMPLOYEES FROM 50 NATIONS WORK IN 17 PLANTS AND 23 SALES OFFICES OF THE EGGER GROUP AROUND THE WORLD. THEY DEFINE OUR COMPANY THROUGH THEIR DEDICATION, EXPERTISE, EXPERIENCE AND LOYALTY.

We support internal career paths but also promote a willingness to perform and personal commitment.

Everyday interaction based on trust and intercultural understanding is part of our company culture.

We train young people to become specialists at all our plants in order to retain them within the EGGER Group over the long term and provide them with continuous development opportunities.

**WE  
ARE EGGER!**

## EGGER MAKES MORE FROM WOOD

AS A FULL-RANGE SUPPLIER FOR TIMBER AND WOOD-BASED MATERIALS WE LIVE OUR MOTTO “**MORE FROM WOOD**”. UNDER THE EGGER UMBRELLA BRAND, WE COMBINE A COMPREHENSIVE PRODUCT SPECTRUM FOR THE FURNITURE AND INTERIOR DESIGN WOOD CONSTRUCTION AND FLOORING.

FURNITURE / INTERIOR DESIGN	BUILDING PRODUCTS	FLOORING
Rawboards, Thin chipboards, MDF boards, HDF boards, Lacquered boards, Lightweight boards, Melamine faced boards, Laminates, Furniture components, Worktops, Front elements, Window sills, Laminate bonded boards, Compact laminates, Acoustic boards, Edging	OSB boards, chipboard sill plates, DHF vapour-permeable wood fibreboards, Timber	DPL Direct pressed laminate flooring, CML Continuous Multi-Layer laminate flooring, DPR Direct Print laminate flooring, Flooring with cork* technology
		

Our product range includes coreboard made of wood-based material such as chipboard, OSB and MDF boards, and since the launch of our new sawmill in Brilon (DE) in May 2008, also sawn and dressed timber. We upgrade our base products

with trend-conforming decors and surfaces. EGGER products are found in the kitchen, bathroom, office, living room and bedroom, in doors and countless other applications of private and public life.

**LIVING & WORKING WITH WOOD**

## A WORLD OF EGGER – TAILOR-MADE OFFERS FOR EVERYONE

Combining functionality and aesthetics is the focus of the construction and interior design sectors. EGGER offers the right products for the job: from high-grade laminate flooring to trend-conforming materials for the furniture and interior design sectors to environmentally friendly wood construction materials.

Under the motto: “The right solution for everyone”, we are guided by the needs of our customers. We market our products for our target groups: **INDUSTRY**, **PROFESSIONAL** and **DIY**.

### → INDUSTRY

Our offering for the target group INDUSTRY is oriented to major customers in the **furniture industry** and wood construction. Our individual customer solutions take functionality and efficiency into consideration along with sustainability and contemporary design.

### → PROFESSIONAL

Our collections for the target group PROFESSIONAL offer a perfectly coordinated product range for planners, architects and tradespeople. Our extensive network of **specialist distributors** ensures that all our products are available from inventory in low quantities. We also offer a comprehensive range of services – from personal advice through the EGGER sales team to an online samples shop and the digital visualisation possibilities of VDS (Virtual Design Studio) all the way to diverse information offerings on the internet.

### → DIY

For the target group DIY, EGGER offers products for the do-it-yourselfer. Mainly flooring – trend-conforming and straightforward to use. We supply well-known international **home improvement markets** with it.

# COMBINING FUNCTIONALITY AND DESIGN

Entire rooms can be designed with EGGER: For this kitchen, the EGGER decor H1487 Bamberg Pine as well as the decor U224 Silk was used for the front panels and F211 Brown Amalvi Marble for the worktop. These are matched to our EM7174 Arkosa Sand laminate flooring.

THE REQUIREMENTS FOR THE DESIGN OF RESIDENTIAL AND COMMERCIAL SPACE ARE INCREASING. THE FOCUS IS NOT ONLY ON FUNCTIONAL ASPECTS BUT ALSO ON AESTHETIC ASPECTS THAT REFLECT THE CURRENT TRENDS.

ARCHITECTS, FABRICATORS AND ALSO THE FURNITURE INDUSTRY CAN MEET THESE REQUIREMENTS WITH EGGER PRODUCTS.

EGGER offers innovative and modern materials for the furniture and interior design sectors in matching colours – from laminate to melamine faced chipboard to matching edging.

## DESIGN TRENDS FOR HOME AND WORK

FROM THE OFFICE TO THE LIVING ROOM, FROM THE KITCHEN TO THE BATHROOM – EGGER OFFERS THE RIGHT SOLUTION FOR ALL INTERIOR DESIGN SITUATIONS FROM FLOORING TO DOORS.

ST28 **Feelwood** nature – double sided synchronised pore with H3324 Gladstone Oak Cognac decor

Every year, we present the latest decor trends for the furniture and interior design sectors in our EGGERZUM in-house exhibition. This underscores our leadership role in terms of design. We are also market leaders, regarding technology. We emphasise proximity to our customers. This allows us to meet a wide variety of requirements and individual wishes. The focus is on functionality, efficiency and design.

With **Feelwood**, we have brought a double sided synchronised pore surface for furniture to the market. The tactile characteristics of the synchronised pore texture correlates with the visual markings of the grain, highlighting the impression of genuine wood.

Our EGGER clic-Tecnology makes it possible to assemble furniture without tools. Instead of glue, screws or dowels, the individual components are joined using a tongue & groove joint system milled into the material.

EGGER **Compact laminate board** incorporates the ideal characteristics for demanding interior construction and for furniture in moisture-prone areas. It is dimensionally stable, easy to clean and fulfils the aesthetics of pure, functional design. This product is part of the EGGER decor and texture combinations concept, enabling the fabricator to offer a uniform decor and surface design with the use of many different coreboards.

With the clic cube, we have created a demonstration model to illustrate the functionality of the clic joints. It is made of EUROLIGHT. These lightweight boards create a wide range of opportunities for the development of flat pack, ready-to-assemble furniture.

The stool by the furniture maker Tresolid, made of EGGER compact boards, successfully demonstrates the combination of aesthetics and functional design.

# SUSTAINABLE BUILDING WITH WOOD

Wood creates a pleasant room atmosphere.  
We used our full range of production possibilities  
for the interior design.

BUILDERS APPRECIATE THE ADVANTAGES OF WOOD IN TERMS OF AESTHETICS, WELLBEING AND CONVENIENCE. EGGER BUNDLES ALL ITS WOOD CONSTRUCTION ACTIVITIES UNDER THE TERM “EGGER WOOD CONSTRUCTION”. WE ARE MORE THAN PARTNERS, WE ARE INNOVATIVE PROBLEM-SOLVERS.

The administrative building in Radauti as the basis for an EGGER architecture using all of our products. The building was constructed over a period of just five months and is the only building in Romania to receive the DGNB gold certificate to date.

Sustainable and energy-efficient buildings can be designed with wood construction products from EGGER.

## OPPORTUNITIES FOR WOOD CONSTRUCTION

The administrative building of the roof and façade specialist Rheinzink from Datteln (DE) is a prefabricated building concept by star architect Daniel Libeskind. EGGER products such as EGGER OSB 4 TOP are used for the sheathing of the roof, walls and ceiling among other things.

### EGGER OFFERS THE RIGHT WOOD-BASED MATERIALS AND SOLUTIONS FOR DEMANDING WOOD CONSTRUCTION PROJECTS.

As load-bearing and reinforcing elements in the roof, walls and ceilings, our EGGER OSB boards offer ultimate loading capacity and dimensional stability. They also have a distinctive appearance. Tailored to their respective areas of application, we offer the stability classes OSB/2 and OSB/3 according to EN 300 as well as OSB 4 TOP with application-oriented approval by the building authorities. OSB boards for use in humid conditions are made with formaldehyde-free or E1 low-emission adhesives. The separate strand preparation for the surface and core layers and the specific strand geometry ensure the best technical characteristics.

EGGER DHF Vapour permeable wood fibreboard are used in roof and wall construction as exterior vapour-permeable and wind-proof sheathing and / or covering. With a nail grid printed at the plant, DHF boards are quick and straightforward to install

without the need for additional nail sealing strips. This saves time and minimises costs.

In addition to our wood construction products EGGER OSB and EGGER DHF, we offer comprehensive know-how and a service package for dealers, planners and fabricators. The wood construction planning handbook forms the core. It contains all the important product information and certificates as well as detailed technological application recommendations for processing our products. With the EGGER INNOVATIVE partnership programme, we have developed a platform for the exchange of technical information with planners and fabricators.

Since the opening of our sawmill in Brilon in 2008, we also offer sawn and dressed timber for wood construction.

# VERSATILE LAMINATE FLOORING FOR EVERY ROOM

FLOORLINE  
H2733 Arlington Oak

EGGER FLOORING IS EXTREMELY VERSATILE IN APPLICATION AND VERY ROBUST IN USE. WHETHER DOWN-TO-EARTH, EXTRAVAGANT, CLASSIC, MODERN OR COUNTRY-HOME STYLE, OUR PROGRAMME OFFERS VERSATILE DECORS AND PRECISELY MATCHING SURFACES IN A VARIETY OF FORMATS.

**VDS**  PROFI

VDS PROFI is a flexible visualisation software and the perfect tool for PC workstations and laptops. It supports the individual design of rooms with furniture and flooring decors.

EGGER **cork+** EC2016 Odenwald Oak  
The cork air cells store warmth and invite you to walk on it barefoot.

Designing your own home with EGGER flooring is child's play. The *JUST clic!* and *PRO clic!* installation systems feature straightforward installation without the use of glue.

## CONVINCING APPEARANCE, STRAIGHTFORWARD HANDLING

EGGER OFFERS AN EXTENSIVE AND HARMONISED COMPLETE RANGE OF FLOORING FOR ARCHITECTS, FLOORING INSTALLERS, INTERIOR DECORATORS AND DO-IT-YOURSELFERS.

For a perfect appearance in the office or an exotic atmosphere in the living room – our FLOORLINE or emotion laminate flooring collections offer timeless, beautiful floors of the highest quality. The new cork<sup>+</sup> collection with the innovative cork<sup>+</sup> technology combines the characteristics of cork and the functionality of laminate flooring in a new product. These collections are distributed to specialist trade partners, flooring installers and interior decorators through our Europe-wide network of distributors.

The MEGAFLOOR collection is tailored to the needs of the do-it-yourselfer. It is offered by select partners in the do-it-yourself market all over Europe.

Our flooring features a convincing appearance – exotic decors, the rustic look of floorboards, tile, stone and metal reproductions and surfaces perfectly coordinated with the decors. All our flooring is also impact and scratch-resistant, wear-resistant and easy-care. With optimised accessories and the right components, every floor can be installed quickly, easily and cleanly.

EGGER quality does not end with flooring. It also extends to a comprehensive system of accessories that range from installation to the care of your new laminate flooring. From the underlay to noise reduction, from the matching baseboards to care products, all accessories are optimally adapted to the flooring.

The EGGER presentation tools are for both specialist distributors and the do-it-yourself segment. Various display stands, collection cases with original samples, a decor book and brochures are available to the specialist trade partners for consultations and sales. The decor book in the new A3 format shows every decor in a large room view and a large detail view.

In the DIY markets, do-it-yourselfer can find information about MEGAFLOOR laminate flooring on the heavy-duty racking and on the pallets. The presentation tools are equipped with sample surfaces, the newly developed “Lookbook” consultation tool and improved product information.

We offer attractive Points of Sale solutions to be used for product presentations by professional flooring distributors as well as DIY distributors.

EGGER takes its responsibility to people and the environment seriously. This is why operating in a sustainable manner is common practice for EGGER.

## RAW MATERIAL WOOD – COMMITMENT TO SUSTAINABILITY

Wood is a valuable raw material. This is why EGGER promotes sustainable forestry as well as the material use of wood in production and thermal use of wood in its own biomass power plants.

### E

**WE AT EGGER FOLLOW THE BASIC PRINCIPLE OF SUSTAINABILITY  
BECAUSE WE KNOW THAT OUR ACTIONS TODAY DETERMINE THE  
QUALITY OF OUR LIVING SPACE IN THE FUTURE.**

That is why we engage in environmentally friendly production in the latest state-of-the-art facilities. From the living tree to the finished product, we count on integrated plants that fully utilise our most important raw material wood in a closed cycle.

The reduction of greenhouse gases in the atmosphere makes a key contribution towards a healthy and intact environment. Wood-based materials have a significant climate advantage which we are utilising: they are carbon-neutral because CO<sub>2</sub> is stored in the wood through

photosynthesis. Through the material and thermal use of wood in our usage cycle, we are making an important contribution towards reducing the greenhouse gas CO<sub>2</sub> which is harmful to our climate.

## THINKING IN CLOSED CYCLES

As environmental, health and safety representative in Hexham, EGGER employee Paul Turner is also responsible for the reed settling pond.

Those who visit our plant in Hexham (UK) will not only find one of the largest production facilities of the EGGER Group but also a special kind of biotope; here we clean our waste water with our own reed purification pond.

Up to 2,100 m<sup>3</sup> of water can be cleaned and returned to nature every day. A straightforward example of how the EGGER principle of thinking in closed cycles is also reflected on a small scale.

**» THE REED SETTLING POND IS PART OF THE EGGER PLANT IN HEXHAM (UK) AND, AS A BIOTOPE, SIMULTANEOUSLY OFFERS A HABITAT FOR FROGS AND NUMEROUS OTHER FORMS OF LIFE. «**

Paul Turner

## FROM THE TREE TO THE PRODUCT – A CLOSED CYCLE

IN OUR CORE VALUES WE HAVE ALLOCATED THE **SUSTAINABLE USE** OF WOOD-BASED MATERIALS THE HIGHEST PRIORITY.

That is why we count on fully **integrated locations**. There, wood is initially used materially. This extends from solid wood production in the sawmill to the production of wood-based materials such as laminate flooring. Wood residues and recycled wood that cannot be used in production is utilised as thermal fuel in our biomass power plants to generate energy for production. We therefore optimise our use of the resource wood to **protect our climate**.

In our environmental cycle, we have summarised all processes of our philosophy.

Promoting Sustainable  
Forest Management  
[www.pefc.org](http://www.pefc.org)

The mark of  
responsible forestry

Experience the environmental cycle through videos and animations on our website [www.egger.com/ecocycle](http://www.egger.com/ecocycle)

### PROTECTING THE ENVIRONMENT BEGINS WITH SUSTAINABLE FORESTRY

Exemplary and sustainable forestry is a top priority for EGGER. For the production of wood-based materials, EGGER only uses wood from forest thinnings and residual wood of a selected quality from sawmills, as well as suitable recycled wood. Within the chain of custody, our plants are PEFC\* and / or FSC\*-certified depending on the availability of wood.

### RECYCLING AND THERMAL UTILISATION OF WOOD

Part of the wood we use consists of recycled wood residues. We process recycled wood in our products and thermally in our biomass power plants. Wood-based materials generated during production that cannot be used materially are burned in our **biomass power plants**. The resulting energy is used for drying wood and in wood-based material production.

\* PEFC (Programme for the Endorsement of Forest Certification Schemes) and / or FSC (Forest Stewardship Council)

## WE REDUCE CO<sub>2</sub>

1m<sup>3</sup> of spruce wood binds  
**825 kg** (1,819 pounds) CO<sub>2</sub>  
 1m<sup>3</sup> of OSB board binds  
**864 kg** (1,905 pounds) of CO<sub>2</sub>  
 1m<sup>3</sup> of raw chipboard binds  
**745 kg** (1,642 pounds) of CO<sub>2</sub>  
 1m<sup>3</sup> of MDF board binds  
**505 kg** (1,113 pounds) of CO<sub>2</sub>

By processing wood in EGGER products, **4.7 million tons** of CO<sub>2</sub>\* are bound in materials every year. This corresponds to the CO<sub>2</sub> emissions of **820,000** households\*\*.

Through the use of recycled wood residues, we save the environment **1.46 million tons** of CO<sub>2</sub> per year. Our biomass power plants reduce CO<sub>2</sub> emissions by **693,204 tons** compared to burning natural gas.

\* Calculated based on the greenhouse potential of EGGER EPDs (in kg CO<sub>2</sub> equivalent, based on production figures for 2012/2013)

\*\* An average European household with four persons generates approximately 5.7 tons of CO<sub>2</sub> per year. Source: according to EUROSTAT 2012

## CERTIFYING THE SUSTAINABILITY OF BUILDINGS

Various building certification systems are currently in use, such as DGNB in Germany, HQE in France, Breeam in Great Britain and LEED in the USA. An European standard-setting body is working towards convergence of the existing standards.

## ENVIRONMENTAL PRODUCT DECLARATIONS

We had the sustainability and environmental compatibility of our products confirmed through independent tests and have disclosed this information in our **environmental product declarations (EPDs)**. These are used in certifying the sustainability of buildings. EPDs are available for all key EGGER product groups. We also obtained EMAS certification for our plant in Unterradlberg (AT) in 2010. This voluntary environmental management system supports EGGER in the continuous improvement of operational environmental protection.

## FROM EUROPE TO THE WHOLE WORLD

Since we laid the foundation for the EGGER Group in 1961 with the first chipboard plant in St. Johann in Tirol, we have been achieving sustainable international growth based on our own performance. Thanks to extensive investments, all of our 17 locations are state-of-the-art.

Regardless of whether a board comes from Rion in South-West France or was manufactured in the Romanian town of Radauti – the same EGGER quality standards apply. These are good prerequisites to continue expanding our leading role in the European wood-based material industry in the future.

# SUSTAINABLE GROWTH BASED ON OUR OWN PERFORMANCE

EGGER has a solid base thanks to its healthy growth, innovative products and high quality standards. Our dedicated and highly qualified employees play a key role in making us one of the leading European companies in the wood-based material industry.

**Profitable growth** is one of the main emphases of the EGGER company philosophy. We finance **investments** in our growth with a **strong equity base** as well as external financing used in a targeted manner.

All of this makes us a powerful and future-proof partner.

## THE WORLD OF EGGER AT A GLANCE – FROM GROWING TREES TO FINISHED PRODUCTS

Raw material wood as the starting point:  
EGGER production capacities in the business year **2012/2013**

Promoting new specialists from our own ranks is a high priority for EGGER. This is why we train young people in our plants every year – from wood work technicians to electricians.
